

NACASY Newsletter nº 25

“Open label, multinational, multicentre, prospective, real world observational study of Naloxegol for patients with cancer pain diagnosed with Opioid Induced Constipation (OIC)”

September 2020

Sponsor

KYOWA KIRIN International plc

Co-ordinating Investigators

Dr Andrew Davies

Dr Jan Tack

Principal Objective

The objective of this study is to assess the **safety and efficacy of Naloxegol** in a real world setting in cancer patients.

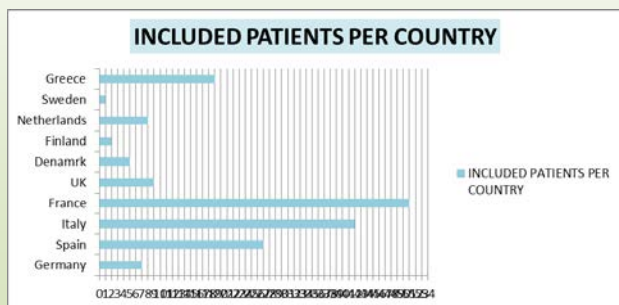

In order to meet the objective, we need to **emphasize the importance** of :

- Including patients who complete the 4 weeks treatment.
- Including patients who be able to complete the Patient's diary and required scales.
- Use Naloxegol according to SmPC, attending to its contraindications.

□

- Recruitment objective: 315 patients
- Number of patients: 170 patients
- Screening Failure: 13 patients
- End of recruitment: **January 31st**

Closure visits were requested and they will take place considering the sites availability.

Please, indicate dates as soon as possible to plan the visits.
